DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-13 and 41-52, drawn to an electronic safe with means for cash and non-cash deposits, classified in class 194, subclass 206.
- II. Claims 14-20, 36-40, 53-58 and 70-73, drawn to an electronic safe and tag identifying a person, classified in class 340, subclass 573.1.
- III. Claims 21-25 and 59-63, drawn to an electronic safe and a wireless portable device, classified in class 705, subclass 41.
- IV. Claims 26-30, drawn to a plurality of safes and a wireless network, classified in class 705, subclass 42.
- V. Claims 31, 64 and 65, drawn to an electronic safe with means for predicting when a deposit cassette is full, classified in class 453, subclass 17.

- VI. Claims 32-35 and 66-69, drawn to an electronic safe with means for generating reports on its operation, classified in class 705, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV, V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an electronic safe without the added features of the safes of the subcombinations of inventions II, III, IV, V and VI. Invention II has separate utility such as an electronic safe and tag without the added features of the safes of the subcombinations of inventions I, III, IV, V and VI. Invention III has separate utility such as an electronic safe and wireless portable device without the added features of the safes of the subcombinations of inventions I, II, IV, V and VI. Invention IV has separate utility such as a plurality of electronic safes and wireless network without the added features of the safes of the subcombinations

of inventions I, II, III, V and VI. Invention V has separate utility such as an electronic safe with means for predicting when a deposit cassette is full without the added features of the safes of the subcombinations of inventions I, II, III, IV and VI. Invention VI has separate utility such as an electronic safe with means for generating reports of its operation without the added features of the safes of the subcombinations of inventions I, II, III, IV and V. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Steven R. Quinley on October 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

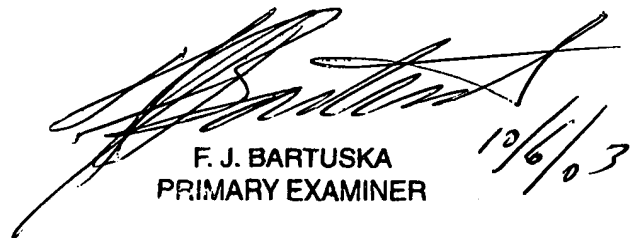

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to F. J. BARTUSKA whose telephone number is 703-308-1111. The examiner can normally be reached on MONDAY-FRIDAY (ALTERNATE FRIDAYS OFF).
